

MARY WASHINGTON HOSPITAL

FREDERICKSBURG, VA

OLEEVUE STICKS & SPROUTS 412
PROJECT DATE: SPRING 2018

OleeVue Sticks & Sprouts in Decorative Glaze Film

OleeVue Decorative Glaze is our trademarked simulated faux etch ink printed on clear film, with the desired pattern printed in a positive image, providing a decorative effect. OleeVue Films can be applied directly to existing glass or acrylic panels in your space. Film is a cost effective alternative that is durable and inviting. Most patterns available 58" wide by unlimited length.

OleeVue Sticks & Sprouts Decorative Glaze film was selected for Mary Washington Hospital's Observation Unit in Fredericksburg, VA. The film was specified by design firm e4h Environments for Health Architecture. Solar Control in Glen Allen, VA worked with general contractor Whiting-Turner to provide a pleasing design for their new space.

"Our film arrived this morning – on time. Thanks for the extra effort from everyone at Olee Creative to make this project a success!"

-Jim Bundick LEED Green Associate
